About me

Computer Engineering student seeking a Software Developer internship. Experienced in developing Android and web applications using Java, PHP, Python, MySQL, HTML, CSS, JavaScript, and Bootstrap. Eager to learn, solve problems, and contribute to software development projects.

Education

Present Education

Bachelor of Science in Computer Engineering Faculty of Industrial Technology
Pibulsongkram Rajabhat University

Project Experience

FaceQRity — AI-Powered Smart Attendance & 2FA System

Won Honorable Mention Award in Student Innovation Awards 2026 (Science & Tech Category)

- Designed the UX/UI to suit system architecture and user needs.
- Architected the overall system structure, including frontend, backend, and security.
- Deployed using Vercel with source code managed on GitHub.

Portfolio Website

- Developed a responsive personal portfolio website using HTML, CSS, JavaScript, and Bootstrap.
- Showcases projects, technical skills, certificates, and contact information.
- Deployed using Vercel with source code managed on GitHub.

Virtual VTuber Concert Project Manager

- Directed a cross-functional team to successfully organize and deliver a university virtual concert.
- Planned project timelines, delegated tasks, and coordinated communication among performers, technical staff, and organizers.
- Ensured on-time project delivery by effectively managing risks, solving unexpected issues, and maintaining team collaboration.
